

Coming soon - LigandTracer MultiDish 2x2

Do you wish that you were twice as many in the lab?
Are you in need to save material, time and money?

With the MultiDish 2x2 you can run two experiments in parallel using LigandTracer Green.

Characteristics:

- Double throughput
- Excellent for comparative studies
- Efficient work flow

How does it work?

- Seed cells in separate compartments
- Run independent binding assays in parallel

What do you gain?

- Data collected at the exact same conditions
- More data per unit of time, reagents, and resources
